

Samir Chowdhury

QA/Automation Engineer

Phone: (864)-279-3206 | Current City: Greer, SC | [Portfolio](#) | Email: samirchow1219@gmail.com | [LinkedIn](#)

Technical Skills & Certifications

- **Testing Tools/Frameworks:** Selenium, Cypress, Playwright, Jira, Zephyr Scale, Postman
- **OS/Virtualization:** Linux (Ubuntu, Rocky), Windows, vSphere, VMware
- **Development:** PostgreSQL, Bash/Shell Scripting, Java (OOP), JavaScript, TypeScript, Python, JSON, SQL, Git, YAML, Maven
- **CI/CD & Automation:** Jenkins, GitHub, Nexus DevOps, Docker, Kubernetes
- **Monitoring and Logging:** Prometheus, Grafana, RabbitMQ
- **Project Tools/Methodologies:** Agile, Waterfall, V-Model, TDD, BDD, CI/CD, Risk-Based Testing
- **Certifications/Continuous Learning:** ScrumMaster® (CSM), Playwright, Security+

Work Experience

Swampfox Technologies – QA Engineer

Jan 2023 – Jul 2025

Columbia, SC

- Performed end-to-end QA across 6 major releases as core team member, participating in requirements review, test design, automated/manual testing, CI/CD validation, and production monitoring across containerized infrastructure
- Increased QA delivery alignment from 20% to 70% by identifying traceability gaps with offshore teams and restructuring test workflows
- Increased AI model response accuracy by 25% through systematic testing of NLU/TTS systems and validation of AMQP queue integration
- Led beta testing for custom application release, validating 100% of critical workflows on customer pre-production systems during live business hours, ensuring zero-defect production deployment
- Reduced new team member onboarding time by 50% through comprehensive QA documentation and standardized training materials in Confluence
- Built modular Cypress (JavaScript) tests in a Page Object Model architecture and reusable utility scripts, integrating UI/API tests with Postman and Jenkins to support scalable, code-driven regression workflows
- Automated Cypress test reporting by integrating REST API calls to publish execution results to Zephyr Scale, improving reporting reliability and reducing manual effort

Academic Projects – Senior Capstone

IIT Student Assessment & Evaluation Database – Backend Developer & Scrum Master

University of South Carolina | Spring 2023

Jan 2023 – April 2023

- Designed MySQL database schema (8 tables) and PHP backend for a faculty assessment system supporting 20+ users
- Led project recovery after mid-semester cancellation, delivering a production-ready system within a compressed 8-week timeline
- Acted as Scrum Master for a 4-person team, coordinating scope, sprint execution, and stakeholder communication
- Application deployed and adopted as the foundation for subsequent capstone cohorts

Education

University of South Carolina

Columbia, SC

Bachelor of Science, Integrated Information Technology

Aug 2019 – May 2023
