

Samir Chowdhury

QA/Automation Engineer

Phone: (864)-279-3206 | Current City: Greer, SC | [Portfolio](#) | Email: samirchow1219@gmail.com | [LinkedIn](#)

Technical Skills & Certifications

- **Testing Tools/Frameworks:** Selenium, Cypress, Playwright, Jira, Zephyr, Postman
- **OS/Virtualization:** Linux (Ubuntu, Rocky), Windows, vSphere, VMware
- **Development:** PostgreSQL, Bash/Shell Scripting, Java (OOP), JavaScript, TypeScript, Python, JSON, SQL, Git, YAML, Maven.
- **CI/CD & Automation:** Jenkins, GitHub, Nexus DevOps, Docker, Kubernetes
- **Monitoring and Logging:** Prometheus, Grafana, RabbitMQ
- **Project Tools/Methodologies:** Agile, Waterfall, V-Model, TDD, BDD, CI/CD, Risk-Based Testing
- **Certifications/Continuous Learning:** ScrumMaster® (CSM), Playwright, CompTIA Security plus

Work Experience

Swampfox Technologies – QA Engineer

Jan 2023 – Jul 2025

Columbia, SC

- Built modular Cypress (JavaScript) tests in a Page Object Model architecture and reusable utility scripts, integrating UI/API tests with Postman and Jenkins to support scalable, code-driven regression workflows.
- Achieved 100% validation of user journey interaction data on production systems as Test Lead for customer initiatives.
- Improved response accuracy by 25% by testing AI-driven NLU/TTS systems, validating AMQP integration, and streamlining model training.
- Increased QA delivery alignment from 20% to 70% by identifying traceability gaps with offshore teams and restructuring test workflows.
- Partnered with Product Owners during sprint planning and backlog grooming to clarify requirements and drive risk-based test strategies.
- Conducted functional, integration, and regression testing for enterprise software, ensuring 90% coverage.
- Orchestrated Jenkins builds across 6 major release candidates, validating Docker/Kubernetes deployments and monitoring system health via Prometheus and Grafana.
- Reduced onboarding time by 50% by streamlining QA documentation in Confluence and creating cross-team training materials.
- Integrated REST API automation to auto-publish execution results to Zephyr Scale, establishing framework ownership and improving reporting reliability.
- Showcased tested features in sprint demos, ensuring 99% validation and reduced production hotfixes.

Academic Projects – Senior Capstone

IIT Student Assessment & Evaluation Database – Backend Developer & Scrum Master

University of South Carolina | Spring 2023

Jan 2023 – April 2023

- Designed MySQL database schema (8 tables) and PHP backend for a faculty assessment system supporting 20+ users.
- Led project recovery after mid-semester cancellation, delivering a production-ready system within a compressed 8-week timeline.
- Acted as Scrum Master for a 4-person team, coordinating scope, sprint execution, and stakeholder communication.
- Application deployed and adopted as the foundation for subsequent capstone cohorts.

Education

University of South Carolina

Bachelor of Science, Integrated Information Technology

Columbia, SC

Aug 2019 – May 2023
